| Fluorouracil Preservative Free Solution | 1% | 15mL | Antineoplastic |
| Polyhexamethylene Biguanide (PHMB) Solution | 0.02% | 15mL | Antiprotozoal |

The benefits of compounding is the ability to customize dosage strengths and the administration and/or form the medication is in for the needs of the individual patient. If you don't see the dose or your patient needs a hypoallergenic capsule, base, etc we can help. Our pharmacists are experts in the science of compounding and are happy to discuss more options than space allows for the most positive patient outcomes.
